

Ubuntu MD October 27, 2018 Meeting

Ubuntu 18.10 Features Overview

1. Gnome 3.30 with most changes under the hood
2. New desktop theme and icons
3. Better battery life for laptops
4. Support for fingerprint scanner
5. Startup faster and improved snaps
6. Linux kernel 4.18 with improved support for usb-c, thunderbolt and AMD and Nvidia
7. Less support for 32-bit flavors of Ubuntu
8. Faster installation and boot times.
9. Miscellaneous
 - UI and UX improvements to GNOME Software (possibility)
 - [DLNA](#) support for connecting Ubuntu with DLNA supported Smart TVs, tablets and other devices
 - A new and improved installer (less likely to be completed before 18.10 release)
 - Ubuntu Software [removes dependencies](#) while uninstalling software
 - Ubuntu Software will show a green verified tick for Snap applications developed by the owner of the brand. The same can be found on the recently [redesigned Snap store website](#).
